

INGREDIENT POLICY

The Arbonne Promise: Pure Safe Beneficial™

It's not just what's in our products, but what's not in them. Botanically based products that embrace the possibilities of green chemistry, with novel ingredients and proprietary blends that deliver results.

Pure

Arbonne is committed to the development of unparalleled products free of harmful ingredients, using a combination of botanical principles and scientific discovery. Our commitment begins with research and testing to ensure that our ingredients meet or exceed industry standards for purity.

Arbonne personal care products are formulated without:

- Animal products or by-products (vegan certified)
- Parabens
- Formaldehyde-donating preservatives
- PABA
- Synthetic dyes
- Triclosan
- Hydroquinone
- Gluten
- These petroleum-based ingredients: benzene, mineral oil, petrolatum or petroleum jelly, phthalates, and toluene

Arbonne nutrition products are formulated without:

- Artificial colors, flavors or sweeteners
- Animal products or by-products (vegan certified)
- Cholesterol
- Trans fats
- Gluten

Safe

Dedicated to uncompromising safety, Arbonne develops product formulas based on the most objective, conclusive and scientifically supported sources available. In addition to following our stringent internal safety policy, we abide by the standards set by:

- U.S. government agencies: Food and Drug Administration (FDA), Federal Trade Commission (FTC)
- Government agencies abroad, including Health Canada, Australia Therapeutic Goods Administration (TGA), and UK Food Standards Agency
- the National Industrial Chemicals Notification and Assessment Scheme (NICNAS)
- the Personal Care Products Council (formerly the CTFA)
- the International Fragrance Association (IFRA)

And by the standards of cosmetic safety set by the:

- European Commission Cosmetics Directive
- European Registration, Evaluation, Authorization and Restriction of Chemicals agency (REACH)
- Cosmetic Ingredient Review (CIR)
- European Commission's Scientific Committee on Consumer Safety (SCCS)

Before bringing a product to market, ingredients undergo rigorous safety assessments, and formulas pass strict safety testing to ensure the highest quality. For cosmetics and skincare, these safety tests include history of use, clinical studies showing no adverse reactions, microbiological testing, irritancy and allergy testing, along with ophthalmology testing for eye products, dermatologist testing for beauty products, and pediatrician testing for baby products. For dietary supplements, safety assessments likewise include history of use and clinical studies. In addition, we use peer-reviewed literature and established pharmacopeias to substantiate safety and efficacy. Our quality program includes microbiological and heavy metals evaluation, and current good manufacturing practices, including adverse event reporting.

We apply the same level of scrutiny to product labeling, particularly for consumable products. Claims must be appropriate and substantiated. We submit dietary supplements for pre-market notification, confirming that they meet or exceed safety regulations.

Beneficial

Arbonne offers premium quality beauty, health and wellness products specially formulated to deliver targeted results and a sensorial experience. We employ consumer and clinical testing for product performance and to ensure our proprietary products meet our consumers' aesthetic preferences. Our best-in-class formulation benefits from the latest advances in research, consumer opinion, and input from our distinguished Scientific Advisory Board.

We combine the best of science and nature for beneficial results. By understanding the biology of the skin and hair, human anatomy, physiology, and other health sciences, we develop botanically based formulas that carefully and honestly deliver on our promise to you. To ensure reliable results, we select the highest-performing ingredients and plant-derived complexes available, using ingredients of standardized quality. From traditional medicinal plants to high-tech extracts, Arbonne harnesses nature at its best for products that promote beauty, wellness and vitality.

Arbonne products are differentiated by:

- Novel ingredients
- Proprietary blends
- Sophisticated ingredient delivery systems
- Sensorial and aesthetic body-mind-spirit experience
- In-house and independent clinical results
- Consistent, measurable efficacy
